

DS Visualisation and Analysis

Abbey Waldron

Experiment Presentations and Final Projects

1. Presentations of your experiments!
2. Introduction to your Final Projects
3. Everyone start work on final projects

Experiments

What should be in your presentation?

1. A description of the problem you have been given (everyone has different tasks so they won't know!)
2. Examples of real life situations/companies where this may occur
3. Description of your experiment, with a detailed timeline and plan
4. Discussion of difficulties you expect, ethical considerations etc. any of the above questions that yielded interesting answers

Presentations

1. Bread
2. Students
3. Sneakers
4. Cows
5. Travel website
6. Bar

Final Projects - Timeline

The deadline to hand the work in is October 30th, 2015 at 11:20 am, on paper to me.

You should include a written report including your answers to all of the questions. These should consist of plots, explanations and/or numbers where appropriate. In addition, you must attach your code to the back of the document.

Final Projects - Timeline

You will all have to give a short (5 min) presentation of your work in class starting at 08:30 on October 30th. It is fine to just show your plots or reports, I will be asking questions!

Final Projects

Next Week

We meet again on the 30th October.

- ▶ You will all present your results (required)
- ▶ You will hand in your reports
- ▶ We will do some preparation for the exam

Good Luck!
